

MQS INTERCONNECTION SYSTEM

FOR THE AUTOMOTIVE INDUSTRY

INNOVATIVE TECHNOLOGIES

TE Connectivity (TE) is a leader in automotive connectivity and sensor technology. Our engineers are always working to meet complex requirements. We connect nearly every electronic function in the vehicle – from alternative power systems to data connectivity and sensor technologies. Our technologies withstand harsh environments and tolerate high temperature, vibration, shock, pressure and long-life in electronic control systems.

INTERCONNECTION SYSTEMS

Our electrical and electronic interconnection products and solutions are used to electrically and mechanically connect wires and cables, printed circuit boards, integrated circuit packages, batteries and more.

HYBRID & ELECTRIC MOBILITY SOLUTIONS

Our technologies leverage decades of innovation and experience with high-voltage transmission and distribution. Our hybrid and electric mobility solutions include a complete line of connectors, terminals, sensors, cable assemblies, contactors, and battery connection protection to help safeguard the flow of power in hybrid and electric vehicles.

DATA CONNECTIVITY

Our wide range of data connectivity solutions are ideal for consumer port connections, high data rate applications, next-generation harness architecture, board-to-board connections and vehicle-to-vehicle communication.

WIRELESS

HIRSCHMANN MOBILITY Wireless Solutions enable high-performance signal reception and transmission for vehicles. We offer customized antenna systems as well as radio tuner systems for all common global standards. Together with the TE connectors solutions we provide One-Stop-Connectivity Solutions with components along the signal chain that are optimized and compatible with each other to provide best signal quality and real-time data.

SENSOR SOLUTIONS

Customers rely on our sensor technology to provide data for control, adaptation and response of vehicle functions and features that increase safety, comfort, efficiency, and more. We collaborate to provide solutions for demanding and harsh applications such as automated transmissions, engines, chassis, clutch, brake and exhaust. Our products can be found in vehicles traveling the world's roads and highways.

CABLE ASSEMBLY

TE is your partner for vehicle-specific cable assemblies. We offer research and development capabilities, prototypes and samples, as well as manufacturing facilities.

RELAYS

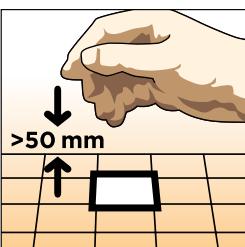

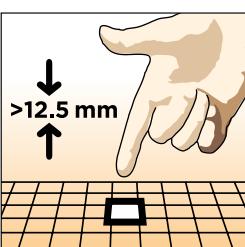

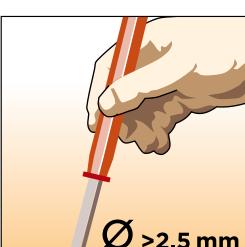

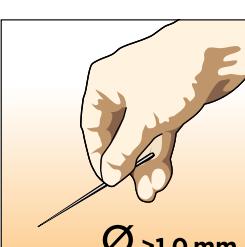

From passenger comfort and infotainment to higher DC voltages and power levels to harsh environments, our relays and contactors provide critical switching functions in multiple vehicle applications. With increased contact gaps and other key design features, our relays are ideal for harsh environments such as shock and vibration.

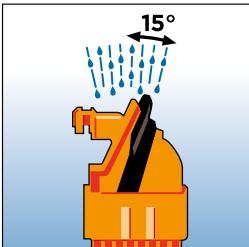

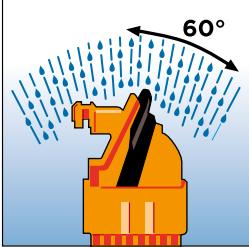

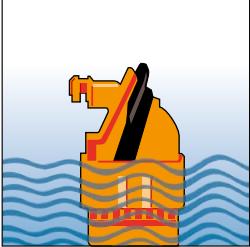

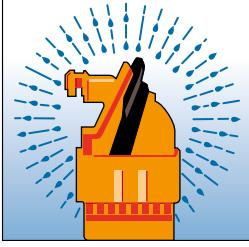

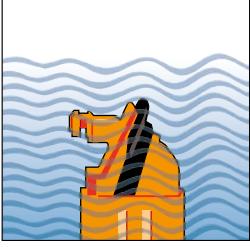

APPLICATION TOOLING

Ensuring a quality connection is essential to delivering high performance and reliability in extreme environments. From crimping a terminal onto a wire or pressing a connector onto a board, our equipment and services are designed to maximize production uptime, extend tooling life and minimize manufacturing waste.

IP Code | Elements and Significance acc. to IEC 60529 and DIN 40050

1st Digit	Against Foreign Objects (incl. Dust)	1st Digit	Against Foreign Objects (incl. Dust)
0	 <p>Not protected.</p>	5K	 <p>Dust protected.</p>
1	 <p>Protected against solid objects greater than 50 mm (ex. back of hand).</p>	6K	 <p>Dust tight.</p>
2	 <p>Protected against solid objects greater than 12.5 mm (ex. finger).</p>		
3	 <p>Protected against solid objects greater than 2.5 mm (ex. tool).</p>		
4	 <p>Protected against solid objects greater than 1.0 mm (ex. wire).</p>		

IP Code | Elements and Significance acc. to IEC 60529 and DIN 40050

2nd Digit	Against Water	2nd Digit	Against Water		
0		Not protected.		5	Protected against jetting water.
1		Protected against vertically dripping water.		6	Protected against powerfully jetting water.
2		Protected against dripping water when tilted up to 15°.		6K	Protected against powerfully jetting water with increased pressure (Automotive).
3		Protected against spraying water (up to 60° inclination).		7	Protected against the temporary effects of immersion up to 1 meter.
4		Protected against splashing water.		8	Protected against continuous submersion agreed with customer, but more severe than code 7.
4K		Protected against splashing water with increased pressure.		9K	Protected against high-pressure/steam-jet cleaning (Automotive).

MQS (Micro Quadlok System) Interconnection System

INTRODUCTION

TE Connectivity's MQS interconnection terminal, connector and header system offers high packing density, robust construction and highest functional requirements.

Despite its miniaturized, compact design, it fulfills all requirements for a contact system suitable for use in automobiles and covers a wide range of application sectors in both waterproof and non-waterproof areas.

The MQS system covers low current up to 7.5 Amps as well as mid current applications up to 45 Amps by offering a range of different terminals and hybrid connectors from MQS 0.63 to PQ 5.2. For the miniaturized portfolio NanoMQS a separate product catalogue is available.

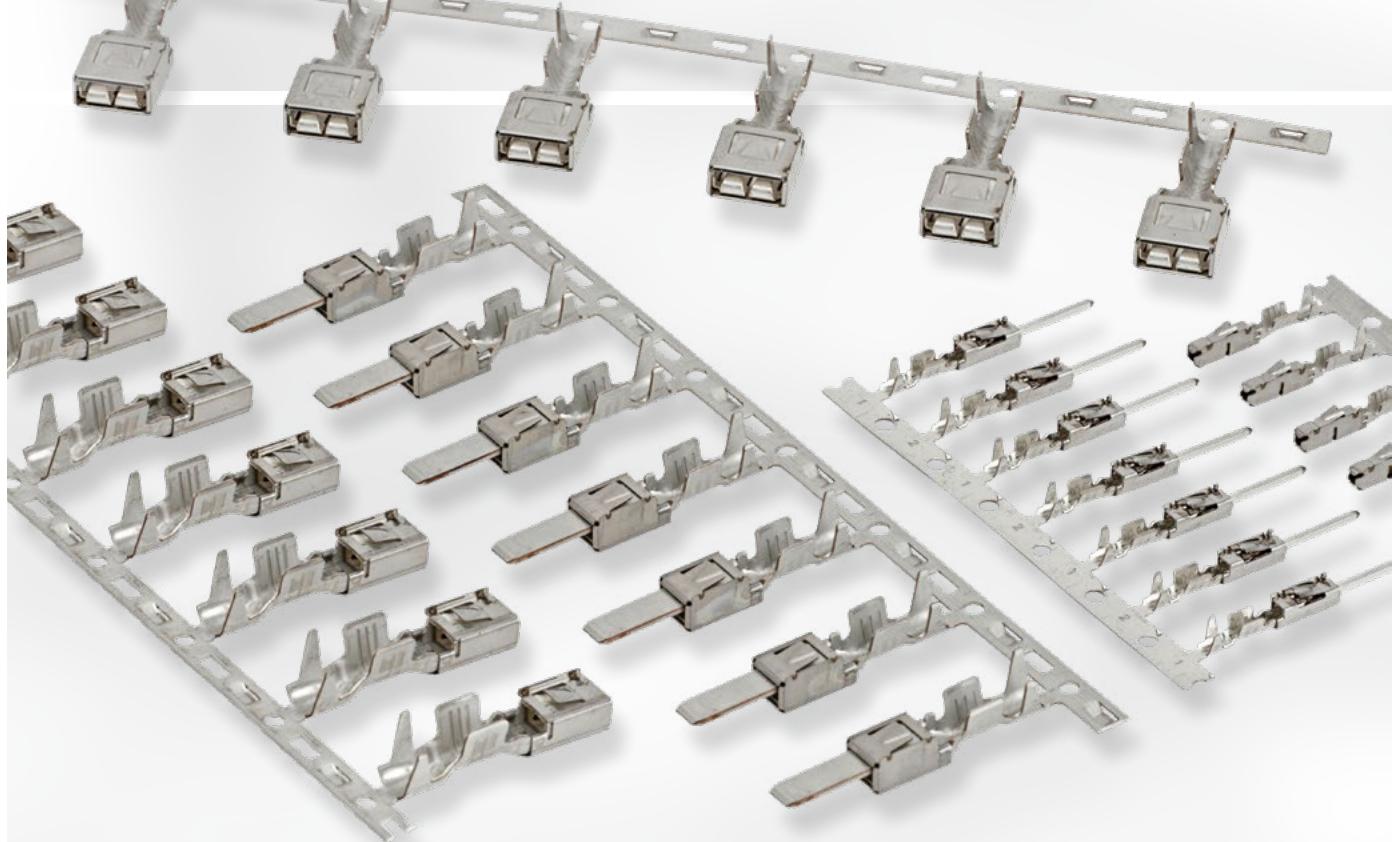

MQS Contact System Features

- High performance copper alloy
- Redundant contact point technology for higher reliability
- High vibration level supported
- Overstress protection of the contact springs
- Box with polarization and secondary locking feature
- Protected locking lance
- Sealed and unsealed version
- -40°C up to 150°C temperature range

MQS Connector System Features

- High vibration level supported
- Designed for reliability and reduced manufacturing and service cost
- Sealed and unsealed as wire-to-wire and/or wire-to-board version
- Provide polarization feature and several key coding
- Provide ergonomic assembly and safe installation
- Locking mechanism with and w/o CPA (connector position assurance)
- Mating aid for high pin-count connectors to ensure low mating forces
- -40°C up to 150°C temperature range

MQS Terminals

TE Connectivity's MQS interconnection system is a series of contact systems commonly used for electrical and electronic applications for passenger cars and commercial vehicles.

The contact design meets standardized blade sizes and interface requirements of the automotive industry. All contacts follow the robust two-piece contact design strategy to separate electrical from the mechanical performance. The contact series is available for sealed and unsealed applications.

The Portfolio of Micro Quadlock System (MQS) with a tab size of 0.63 mm is complemented by the Micro Power Quadlock (MPQ) with a tab size of 2.8 mm and the Power Quadlock (PQ) with a tab size of 5.2 mm.

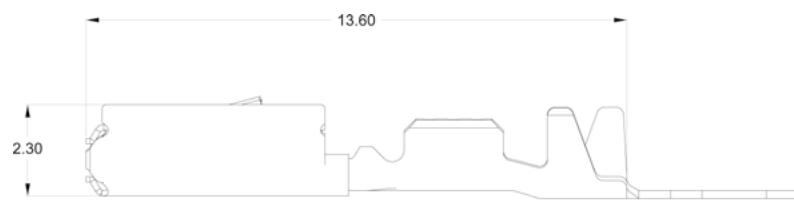

For a fast and economic termination process, TE Application Tooling is offering a vast portfolio of application equipment and service.

MQS Interconnection System Advantages

- High performance copper alloy
- Redundant contact point technology for higher reliability
- High vibration level support to meet future requirements
- Overstress protection of the contact springs
- Clean body terminal solution also available
- Contact box with polarization and secondary locking feature
- Protected locking lance
- Sealed and unsealed version
- -40°C up to 150°C temperature range

MQS Housings and Connectors

MQS connectors offer high reliability for use in the automotive industry.

The MQS connector system offers receptacle and tab housings with capability for water-proofing and resistance to conditions of high vibration.

In order to allow for combination of low and medium current – several hybrid connectors complete the MQS connector system in addition to flexible foil connectors for complex space constraints which can be found for example in battery cell modules.

Features

- CPA (Connector Position Assurance) capability
- High reliability status – supported for long term use
- High vibration level supported
- Perfect design to avoid quality problems, reduce manufacturing and service cost
- Wire-to-Wire sealed and unsealed connectors
- Polarization, several keyings
- Locking mechanism for smaller connectors/mating aid for higher numbers of ways
- Hybrid and flexible foil (FFC) connectors available

Application Tooling

TE Application Tooling is dedicated to providing high quality equipment options to meet all levels of our connector products specifications. We are also able to provide a broad range of equipment for other manufacturer's products.

Our equipment range is vast and almost unmatched by others operating in the same industry segments, as is our global presence and support network in the form of field service engineers and product managers. We supply everything from simple hand tools to the most complex automated systems.

Equipment is segregated into two types and managed accordingly:

Generic Equipment

Where we can supply you with sufficient information referenced by part number such that you can identify and order what you need yourself.

Specialized Equipment

Where you will need help from our product managers to identify what's just right for your application.

Finding Equipment Online tooling.te.com

- Powerful searches to find generic equipment options (Hand Tools / Applicators).
- Brochures and more detailed flyers for the specialized equipment.
- It's quick, easy and more importantly the latest and most up to date information available online.

TE CONNECTIVITY ONLINE

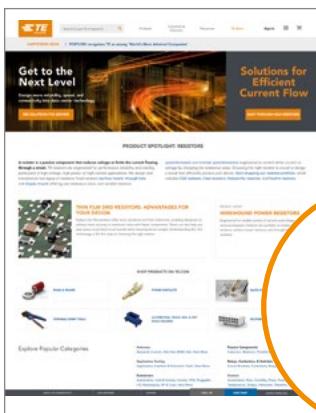

TE.com offers an enhanced digital experience, with more than 250,000 parts profiled. The site has deep, rich product data and easier access to tools and services. Other offerings include improved search and navigation and knowledge and idea sharing.

TE AUTOMOTIVE

We are one of the leading providers of advanced automobile connectivity solutions. The automotive industry uses our products in automotive technologies for body and chassis systems, convenience applications, driver information, infotainment solutions, miniaturization solutions, motor and powertrain applications, and safety and security systems. TE Connectivity is developing automotive solutions to help drive innovations for designs today and into tomorrow.
